

# Live Proctoring

For high-stakes exams, critical certifications, and pre-employment screenings, Examity’s Live Proctoring solution is the most secure choice for advanced online assessments.

When it comes to test integrity, we recognize that every exam comes with a unique set of considerations. And fortunately for our partners, we provide you the flexibility to select from one of two live proctoring solutions to best meet your needs.

## Live Standard

Our industry-leading approach to live, online proctoring provides everything you need for the most secure test-taking experience possible.

Beginning with live authentication, Examity’s live proctor will first verify that the ID on file matches with the ID brought to the test, and then compare the two with a real-time webcam feed of the test-taker. After a challenge question, the test-taking environment then becomes the main focus. Examity’s live exam proctor will conduct a 360° sweep of the room and workstation, ensuring any unauthorized materials are removed before testing can proceed.

Once live authentication is complete, the proctor will provide the test-taker with access to the exam, and the Examity proctor will leave the session. Although a human proctor is not present, the exam session will be recorded from start to finish, and our AI-technology will monitor the exam for any unusual activity. Upon exam completion, an Examity proctor and an Examity auditor will review both the authentication process and proctoring session. Only after this review takes place will the entirety of the recorded session, along with the corresponding reporting data, be released to your Examity dashboard.

### Standard

- ✓ Live authentication
- ✓ Live review of exam recording
- ✓ Flagged violations with video
- ✓ Human audit
- ✓ Reporting and analytics

### Premium

- ✓ Live authentication
- + **Live, low-ratio proctoring**
- + **Real-time, on-screen support**
- + **Immediate exam intervention**
- + **Pause/resume exam function**
- ✓ Flagged violations with video
- ✓ Human audit
- ✓ Reporting and analytics

## Live Premium

With the same capabilities of Standard Live Proctoring’s pre-test authentication and post-test audit, Premium Live Proctoring offers an extra layer of security. That’s because the live proctor will oversee the entire session, from authentication to test completion. Such a high level of security allows a proctor to proactively address suspicious behavior or respond to a technical question, should such a need arise.

This level of live proctoring is recognized throughout the industry as the best choice for high-stakes exams; presenting the highest possible level of security. And as an added advantage, Examity proctors are able to provide interactive technical support in real-time if necessary.
